Intestinal nuclear receptor signaling in cystic fibrosis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 1 November 2017 at 11.00 hours

by

Marcela Demmin

born on 11 September 1988
in Bratislava, Slovakia

Supervisors

Prof. H.J. Verkade

Prof. J.W. Jonker

Prof. F. Kuipers

Prof. G.H. Koppelman

Prof. R.H.J. Houwen

Paranymphs

Marleen Schonewille

Ivo Pieter van de Peppel

The research described in this thesis was conducted at the Department of Pediatrics, Section Molecular Metabolism and Nutrition, University Medical Center Groningen, The Netherlands. This project was funded by the Dutch Cystic Fibrosis Foundation (Nederlandse Cystic Fibrosis Stichting) and by the Jan Kornelis de Cock Stichting.

The printing of this dissertation was financially supported by:

The University of Groningen

The University Medical Center Groningen

the Groningen University Institute for Drug Exploration (GUIDE)

Table of contents

Chapter 1	General introduction and scope of the thesis	7
Chapter 2	Intestinal PPAR δ protects against diet-induced obesity, insulin resistance and dyslipidemia	27
Chapter 3	Impaired intestinal farnesoid X receptor signaling in cystic fibrosis mice	51
Chapter 4	CFTR potentiator ivacaftor restores FGF19 regulated bile acid homeostasis in cystic fibrosis patients with a G551D mutation	93
Chapter 5	Laxative treatment ameliorates bile acid metabolism and FXR/FGF15 signaling in mice with cystic fibrosis	107
Chapter 6	ASBT is a major determinant of intestinal cholesterol transport	123
Chapter 7	General discussion	143
Appendices	Summary in English	163
	Sammenvatting in het Nederlands	163
	Acknowledgements	167
	List of publications	171
